Evidence Produced That Dr. Cronin Was Murdered Shortly After Leaving the filled teeth PAUL HOEFLICH & BRO. Conklin Residence - A Story Comes From Winnipeg That Burke Made a Confession While in Jail There.

CHICAGO, Oct. 26.—If the Cronin jury is unduly influenced, it will not be Are still offering the best inducebecause the state does not take every possible precaution against it. Not ments, such as no other house can only are the bailiffs as revere in their watch of the jurors as if they were so many criminals, and liable to break the leading cities of the East, we are prepared to sell, at wholesale chance, but there are scores of decertives that guard the sidewalk between the Commercial hotel, where the ju.y stop, and the criminal court building. whenever the jury is taken to or from

the building.

The crowd that sought to obtain admission to the Cronm rim yes eras; was even greater than the presion, day and included many ladies. The baintiffs that guarded the entrances had their bailets. hands full to prevent overcrowding. The attraction was the prospect of new and sarting evidence. Before court opened the blood-stained trunk was transferred from the South Side where it had been kept since the inquest, to the vault in the stace's attorneys onice. It will be introduced in evidence at an early stage of the trial.

the arst witness called by the state was Nicholas Walienborn, a wnolesaie liquor uealer at 319 Division street.

T. T. Conklin, in whose house Dr. Cronin lived, was the next witness. Mr. Conklin knew Dr. Crouin intimately. The doc.or had been a member of his The doc or had been a member of his family some ten years. Witness was called to the Lake View morgue at 10 o'clock the night of May 22, and in company with John F. Scanlan, John J. Cronin and several other triends, he recognized the body as that of Dr. Cronin. He recognized it by the forehead, the hair, the mose, the teeth, the hands, an injured finger and the general appearance. The peculiarity of the teeth were: They were large and wide apa t; four of his from h teeth in the lower law were missing; he had the lower jaw were missing; he had faise ceth and wore a piate; one tooth

on the right side was missing.
Ar. Forrest took the witness and ne him as to his idea of Cronin's height and weight. Then the lawye. proceeded to investigate the witness' re ord. Court then adjourned to 2 o'clock.

Whatever doubts had existed regarding the fact that Dr. Cronin was killed within a short time after leaving the within a short time after leaving the Conklin residence, were set at rest by the testimony given at the afternoon session, when Dr. Egbert produced a number of pars containing the contents of the stomach of the murdered man. The food, he said, had scarcely commenced to digest, and had been taken in the stomach less than three hours before death. The jury glanced at the contents of the jar, while the people in the court room craned their necks to get a look at the receptacles. The witness went on to minutely describe the ness went on to minutely describe the condition of the body. All the internal organs were in excellent condition, and there was not the slightest evidence of disease, internal or external, although the brain and its covering were terribly

decomposed. There was a wound two inches long and a half inch wide at the corner of the left eye, while near by the skull was ag: in fractured and a small portion clipped away. Near the left temple was a wound two inches long and extending to the skull. Back of this was another almost the same size, while back of the left ear was a ragged wound that joined the other two. On the left of the back of the head there was another ugly wound, two and a quarter inches long and a fourth-inch wide, in the center of which was a flap of the skin of the scalp. This had been beaten into the tain layer of flesh on the skull by the force of the blow, and was at tached to the remaining skin at the up-per portion of the wound. The lungs were free from water despite the fact that the head was below the surface when found and, as the physician testified in the most emphatic manner, there was not the shadow of a doubt that Dr. Cronin's death was caused by the wounds he received.

Judge Wing and Mr. Forrest took turns in cross-examining the witness for nearly two hours, with the view of securing an admission that the wounds upon the body might have been occasioned by rough usage while getting it out of the vault. Dr. Egbert insist-ed, however, that they were indicted prior to his death, and his testimony in other particulars remained unshaken.

New York Ties the Brooklyns for the World's Championship.

NEW YORK, Oct. 26. - Another chilly afternoon greeted the players and spectators of the sixth game in the world's championship series at the polo grounds. Not over 2,000 people were present when play was called. The game was the best and most exciting thus far played. Brooklyn scored then first and only run in the second, carning it on hits by Pinckney. Visner, Terry and Corkhill. Both teams played finely after this, and until the tying run was scored in the muth inning all was excitement among the

spectators. After Tiernan and Ewing had been retired in the ninth Ward hit safely to center, and by fine base running and clever sliding safely stole second and third bases. Roger Connor then hit safely past second, sending Ward in

MORE ABOUT CONSUL LEWIS.

The Records of the State Department Show That the Charges Are Unfounded. The Cabinet Considers the President's Coming Message - Other Washington News.

Washington, Oct., 26. - Walker Blaine stated this morning that so far the records of the state department show the charge of Ramon Azoque, exinterpreter at the United States consulate in Tanglers, against Consul Lewis, of withholding his pay as interpreter is unfounded. The evidence adduced in the case. Mr. Blaine says, is that when Mr. Lewis was appointed in 1886, he employed Azoque, who is a naturalized Moor, as interpreter at a salary of \$50 a month for a year. Azoque was attached to the consulate until Sept. 30, 1888,

when he was discharged by Lewis.
The vouchers on file show that
Azoquer receipted for his money up to
that time. He remained about the consulate eleven months longer, but Mr. Lewis asserts that he did so, with the distinct understanding that he would not be paid. Any claim that he may have against Lewis on account of salary, Mr. Blaine says, is a purely rivete one

No Requisition for Burke.

Washington, Oct. 25.—There was a rumor about the state department that the governor of Louisiana had forwarded papers to the state department requesting the extradi ion of Maj. E. A. Burke, ex-treasurer of Louisiana, who is now in England, and against whom charges of mal administration while state treasurer of Louisiana, have been published. Walker Blaine, solicitor of the state department, to whom the papers would naturally come for action, said to the United Press reporter, that he had received no such request, and knew nothing about papers containing such a request being on the way to the state department.

OIL TRAIN WRECKED.

Engineer, Fireman and Brakeman Burned to Death.

Кокомо, Ind., Oct. 26. -- There was a frightful accident at 4 o'clock yesterday morning on the Lake Erie and Western road, one mile south of this city. Train No. 92, bound north, in charge of Conductor Frank L. Forbes, with twenty-five cars, mostly loaded with oil and coal, was wrecked at the intersection of a switch which leads to the Kokomo

The engine, No. 79, was in charge of Engineer Jake Mehal and Fireman Ed. Bulnett As the train neared the Bulnett. As the train neared the switch target the engine jumped the track, and the scene that followed was indescribable. Thirteen cars, loaded with crude oil, were piled up against the demoiished engine in a shapeless mass. Terrific explosions of oil tanks immediately followed, two huge tanks being hurled 200 yards away, and Pete's Run, a small stream, was on fire for a quarter of a mile with burning oil. As explosions followed each other in quick

quarter of a mile with burning oil. As explosions followed each other in quick succession and volumes of flame shot upwards for hundreds of feet, the scene was frightful.

Immediately the fire alarm was turned in, and hundreds of people from the city went to the scene of disaster, only to be horrified to learn that Engineer Jake Mehal, Edward Burnett and the front brakeman, John Spellman, all of Peru, Ind., were under the wrecked engine. There was none of the crew left but Conductor Forbes and Brakeman Hiteschew to tell the tale of the fearful wreck, who stated to your correspondwreck, who stated to your correspondent that they had slowed up to enter the city at the rate of four miles au hour, when suddenly the crash came, in what manner they were unable to explain, while persons living in the vicinity state that the train was running at

the rate of forty miles an hour.

The fire department soon had the flames under control in the vicinity of the engine, and the work of rescuing the bodies of the three men was begun. In a short time their unrecognizable, charred remains were found buried be-neath the rubbish. The heads and lower limbs of the men were burned off, and each body was only recognized by articles found in their pockets. Coroner Turpin, of this city, was present, and took charge of the remains. Soon a wrecking train from Peru was dispatchwrecking train from Peru was dispatched to the scene, and the work of clearing the track began. A special from Indianapolis, bearing General Superintendent Hill and other officials of the road, arrived. When the wreck in the vicinity of the switch was cleared away, the switch, which was an old one, not in use, and which had been spiked shut, was found to be opened and the spikes either cut or drawn, which is now generally believed to be the dastardly work

of some vandal. Coroner Turpin will begin a thorough investigation on Monday, the 28th. In the meantime detectives are at work on the case. Nineteen cars An absolute pardon was granted to were burned—thirteen containing oil, George C. Wood, convicted of polyga- four containing coal, and three laden my in Utah, and sentenced to five with merchandise of various kinds. Superintendent Hill estimates the loss at \$40,000. The engineer and fireman were both men of families. The stricken widow of Engineer Mehal was brought down on a special train from Peru, where the bodies, or what resembled bodies, were sent for burial this even-

At a late hour yesterday evening the wreck was cleared from the main track and trains are now passing.

Judge Lewis and his posse of sixty men left Harlan court house at 9 o'clock vesterday morning to make another assault on Howard's camp.

Howard, anticipating this movement, had placed his followers in ambush near the town. The Lewis party passed directly through the ambush, and for some reason were not fired on. After they had got beyond their foes, who were concealed in the brush and were proceeding in the direction of where Howard's camp was supposed to be, the Howard party moved into the town and

THE MONEY MARKET MORE EASY.

No Serious Disturbance Feared, While an Excellent Crop Report Greatly Enlivens Business of All the Leading Trade Centers-R. G. Dun & Company's Financial

NEW YORK, Oct. 26.-R. G. Dun & Company's weekly review of trade says: The money market has become more

The bank of England gained last week \$1,270,000, and the bank of France \$230,000 gold. Securities do France \$230,000 gold. Securities do not appear to be moving largely either way, while merchandise exports for three weeks show a gain of 14 per cent. over last year, against a gain of 10 per cent, in imports. The rate of foreign exchange has accordingly declined a shade. Meanwhile commercial paper is more active here; some of the banks have begun buying, while the amount offering is unusually small this season, and merchants, generally report more satisfactory collections than usual.

There is a little more stringency at Omaha, less at Cleveland, and an active demand with a conservative tone at Chicago, but otherwise the markets

chicago, but otherwise the markets west and south all report supplies adequate for legitimate needs. Philadelphia finds money hard to get, but commercial paper moves at 6 to 7½ in fair amount, and at Boston more paper is offering at 5 to 6 per cent, and upwards, with manufacturing loans at 4½ to 4½. Collections are unusually satisfactorily at almost at 1 points, though Milwaukee. at almost all points, though Milwaukee notes some tardiness, because farmers hold back products for better prices.

The volume of trade, fair for the sea-The volume of trade, fair for the season at all points, is greater than a year ago at most, though the aggregate of bank clearings, outside New York, exceeds last year's but 2 per cent. Chicago finds a larger increase, particularly in dry goods, while sales of clothing and shoes are fair, notwithstanding mild and dry weather; of provisions larger than last year's, and of grain about as large. Boston notes a fair trade in dry goods, a free movement of hides at lower prices, sales of leather hides at lower prices, sales of leather for present needs, and well sold stocks of boots and shoes. The trade in lum-ber is fair, but best in finishing hard wood; iron foundries are doing a good business, with manufactured iron free in sales and firm in price, and coal is steady. The trade in food and groceries is good, but mackerel and cod are scarce. Philadelphia also notes more activity in clothing, a good trade in liquors, and moderate sales of chemicals at better prices.

The wool trade has been the largest here for a long time, and more active at Boston, where sales were 3,100,000 pounds, dull at Philadelphia. Plainly some manufacturers are taking hold

Iron grows stronger, the Thomas company having a lyanced its price \$1; a demand from Canada and from Mexico is felt, foreign prices being high. Bar iron is firm, blooms and billets feverish, and rails are \$31.50 to \$32, the orders already booked for 1890 amounting to 750,000 tons or more. Copper is steady, tin a shade lower here at 20¢ cents. and lead depressed to 3¢ cents by expectation of laws Mexicon samples. pectation of large Mexican supplies.
The coal trade is duil, and the week's meetings have accomplished nothing beyond fixing upon 3,000,000 tons as the outpot for November; sales are gen-erally below the schedule, stove at \$3.90

Liquidation in wheat continues, with prices three cents lower than a week ago, and sales of 65,000,000 bushels here. Stubborn facts, heavy receipts and scanty exports wear out the pa-tience of those who have had faith in a world's famine, and state official reports indicate a larger yield than those of the department. Corn is a cents higher, with sales of 5,500,000 bushels, and the export movement still exceeds last year's. Pork products are weak, and in hogs the decline has been thirty cents per 100 pounds. Oil has risen three cents, coffee is unchanged and sugar is again lower. Cotton continues downward, receipts exceeding those of the same week last year by 40,000 bales, and exports by 30,000 bales; and while there has been a touch of snow in Virginia; the dreaded frost in cotton states is still

the dreaded frost in cotton states is suited deferred.

The market for securities has been weak, in spite of relief in the money market and some very favorable reports regarding particular properties. The traffic arrangement between Union Pacific and Chicago and Northwestern is thought to foreshadow an abandonment of the so-called presidents association, and an attempt to secure more effective consolidation, Earnings are 10½ per cent, larger than last year's, but the Pennsylvania statement for September shows a very scanty increase, and shows a very scanty increase. shows a very scanty increase, and causes disappointment. The treasury has done little to help or hinder, but has increased its cash holdings \$900,000 for the week. On the whole the speculative markets are not promising, and are judiciously let alone by the public. But the outlook for all departments of legitimate business is more encouraging legitimate business is more encouraging who knew the combination of the safe, than it has been for a long time. was found, and the girls were liberated. than it has been for a long time.

The business failures occurring

throughout the country during the last seven days, as reported to R. G. Dun & Company, the merchantile agency, by telegraph, number for the United States, 188, and for Canada 37, or a total of 225 failures, as compared with 228 last week, and 214 the property of the country during the last seven days, as reported to R. Dun & Lawrence, Mass., Oct. 26.—Joseph S. Bonney, aged 62, for thirty years a resident of this city, and a well known inventor, shot himself through the heart this morning. He was a prominent Mason and Odd Fellow.

THE NAVASSA RIOTS.

Further Particulars of the Negro Uprising There.

BALTIMORE, Oct. 26. The United States man-of-war Galena, Rear Admiral Gherard, commanding, arrived in the harpor from Navassa island at 5 o clock yesterday afternoon, and anchored off Fort AcHenry. She had on board nine Navassa negroes, eight of whom were engaged in the murderous riots on the island of Navassa recently, six of them being the instigators and perpetrators of the murders of the white bosses. The names of the latter six are: Albert ones, the chief of the lot, whose home is on ritzwater street, Philadelphia; Amos Lee, of George-town, D. U.; Thomas Weich, Washington; George Singleton Keys, of Washington; Henry Jones, of Greensboro, W. Va., and James Phillips, of Balti-

The money market has become more easy, with the prospect that serious disturbances this season is no longer to be apprehended. The banks are running with narrow reserves, and artificial stringency may at any time be engineered, but the movement of crops has been heavy. In the natural course of events the return of money to this country should soon begin, and the possibility of a foreign drain seems more remote.

The bank of England gained last week \$1,270,000, and the bank of trict Attorney Thomas G. Hayes, Chief United States Deputy Marshal Paac and several other oricials boarded a tug and several other officials boarded a tug and went to the war ship, and after an exchange of the proper official papers the prisoners were put aboard the tug and taken up to the Baltimore jail. Lee, Key, Henry, Jones and Welch are accused of murder; Albert Jones and Phillips with mutiny and intent to kill.

The traiena sailed from Navassa oct.

The Galena sailed from Navassa Oct. 10. When she arrived at Navassa the British war vessel Forward was already there, and her timely coming probably saved the lives of the remaining six whitemen. The Forward's officers took all the arms and ammunition away from the negroes. The story told by the officers of the Galena regarding the riot is much the same as that already published. One of them said, however, that the white bosses practiced great brutality against the negroes.

Bobert Powns, one of the two ne-groes who are to be used as witnes es, contradicts Dr. Smith in one important point. The doctor stated that the first firing was done after he and his associates had taken refuge in the house. Downs told a United Press reporter that the first shot was fired in the yard. and that Smith fired it. He had directed Mr. Jones to take charge of James Phillips. The negro resisted, and Dr. Smith fired a load of bird-shot into his face. This was the beginning of the fight. The white men ran to the house, locked the white men ran to the house, locked themselves up and continued to shoot, the negroes returning the fusila te with stones. Finally, Amos Lee resorted to the use of the dynamite. Downs says it was Keys who killed Mahon. This was after the whites had surrendered. He saw Keys shoot Mahon in the back and in the forehead. Downs says ha and in the forehead. Downs says he was merely an onlooker, taking no part whatever in the fight.

William James, the other witness, admits that after the fighting began he threw rocks at the house. The ringleaders are keeping their own counsel. Admiral Gherard says the brigs Romance and Alice, with 124 negroes aboard, may not arrive inside of a week.

Serious Results of a Fall.

GIRARD, O., Oct. 26.—The roof of the new hot blast of the Girard furnace fell in yesterday, while a number of workwith more confidence, the market had ing been nearly cleared of some grades of foreign stock imported under old rulings, and imports of worsted shaving pipe, and the escaping steam terribly burned William Anderson and his two burned William Anderson and his two sons, Dell and Charles. They were also cut, but may recover. Four others sustained bad cuts and bruises, but were not dangerously hurt.

Premature Explosion of a Cannon. ZANESVILLE, O., Oct. 26. While firing a cannon for the Foster-heridan meeting yesterday evening, a premature discharge blew on both arms and terribly burned William H. Nettitt, who was ramming the charges. His sight was destroyed and surgeons have amputated his arms, but he cannot sarvive. He was formerly a prominent business man. One of his brothers was an engineer, and was killed by his engine ex-
